File 17594

STATE OF TENNESSEE
DEPARTMENT OF ENVIRONMENT AND CONSERVATION

State Requirement for
Saad Site #19-533

TDSF expects a complete RI/FS for the site. TDSF is in the process of Drafting a Commissioner's Order for the RI/FS to be implemented immediately upon the completion of the removal of the source of contamination pursuant to EPA authority. The RI/FS shall follow the requirements as set forth in TN Rules 1200-1-13 et. seq. under the authority of Part 2 of the Hazardous Waste Management Act, T.C.A. 68-212-201 et. seq. The RI/FS will include the soil and groundwater. If the soils are clean or removed through EPA removal, the data shall be included in the RI/FS. If soils are not clean, additional work will be required and incorporated into the RI/FS. Additional data will be required for groundwater. Once the completed RI/FS is approved, A ROD will be developed. The decision documented in the ROD shall be implemented.

A natural resource damage assessment may be implemented to determine natural environmental damage that has resulted from this facility.

July 20, 1994

J. David Randolph

Presented to Saad Committee on this date.
